DELIVERING AND EXCEEDING EXPECTATIONS

Established in 1996, Metcalf Crane Services was founded by Tim Metcalf. Along with steel erection, road infrastructure became a staple for Metcalf Cranes strengthened by our transport capability at Metcalf Heavy Haulage.

The rapid growth of Metcalf Cranes continues with the fleet beyond thirty cranes and some twenty truck / trailer combinations.

A focus on value adding for all employees has seen the addition of an in-house training capability (Cert IV Training) with MCS again exceeding industry standards. Our Engineering and compliance team remains industry best and continue to lead the way in an ever demanding space.

Our engineering capability continues to offer further improvements in safety awareness with products such as our award winning counterweight access platforms, along with modular spreader bars and sling spreaders to name a few.

Our Demag TC2800-1 600t mobile has phenomenal lifting performance along with a portability not available in similar sized crawler cranes. Opportunities in wind farm construction, petro-chemical plants and mining environments are now reality in the Metcalf landscape.

EXPANDING TO MEET MARKET DEMANDS

Still with an unparalleled reputation for service, quality modern equipment and very much focussed on 'Getting The Job Done', Metcalf Cranes continues to thrive in an ever expanding market place.

Metcalf Cranes provide mobile crane hire services Australia wide. The fleet ranges in size from 3t Mini-Crawler to 600t Mobile.

Our experience in general rigging, steel erection and pre-cast panel erection has led to a reputation for unparalleled service.

The fleet is now one of the more significant in the industry.

OUR REPUTATION

Metcalf Crane Services has built a reputation for unparalleled standards and we pride ourselves on a reliable and trustworthy service. A hallmark of that reliability is the client expectation of only ever having to make one phone call and knowing the job will get done.

Across the board, this "Getting The Job Done" attitude has seen an abundance of work on major projects working for a range of contractors and sub-contractors on large projects.

OUR SERVICES INCLUDE

- General Crane Hire
- Bridge Beam Erection
- Steel Erection
- Shutdown Works
- Rail Occupation Works
- Wind Turbine Construction
- Pre-Cast Panel Erection
- Wind Farm Maintenance
- Engineered Lift Studies
- Riggers / Dogmen
- Heavy Haulage
- Mini-Crawler Crane Hire

AT METCALF
CRANE SERVICES
WE HAVE A WIDE
SKILL SET AND CAN
ACCOMMODATE
ALL FORMS OF
CRANE AND
RIGGING WORK.

PERSONNEL

OPERATORS

- Pin Jib Crane
- Open Ticket Crane
- Hydraulic Crane
- All Terrain Crane
- Tower Crane
- Crawler Crane

GENERAL

- Shutdown Coordination
- Mechanical Engineer
- Cert IV Trainer
- Forklift Operator
- Project Supervision
- Dogmen

RIGGING

- Wind Turbine Construction Supervisor
- Rigging Supervisors
- Gold Card Riggers
- Structural Steel Riggers
- Panel Riggers
- Mechanical Riggers

BRIDGES

Marquee bridge lifts are what we are known best for. Our ability to plan and execute large complex lifts in difficult conditions make us the only choice when selecting a crane company for bridge lifts of all designs. Precast super t beams, steel trough girders, prefabricated pedestrian bridges and modular section bridges are all in a days work at Metcalf Crane Services.

Utilising modern CAD design software, we are able to produce high quality 3D plans which ensure your marquee lift is completed safely and efficiently.

- **Melton Highway**
- **Toolern Creek**
- **Shepherds Bridge**
- **English Street Bridge**
- **Buffalo River Crossing**
- **Swan Street Bridge**
- **Sneydes Rd Interchange**
- **Pacific Highway Upgrade**
- **Chandler Highway Duplication**
- **MLS Tullamarine Airport**

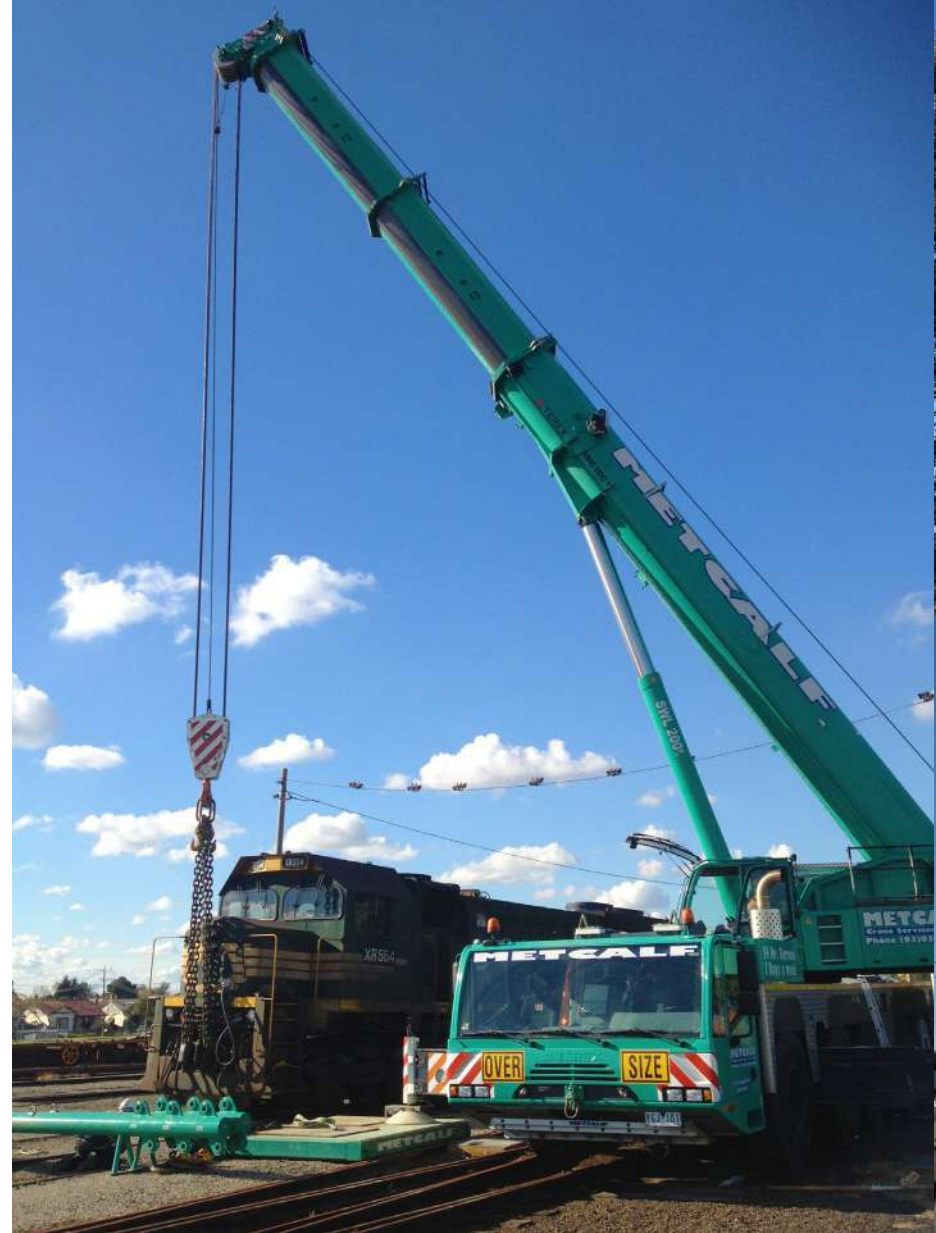

RAIL

Metcalf Crane Services have enjoyed a long and proud history working in the rail corridor.

Our commitment to safety and our understanding of the challenges faced working in this environment see Metcalf Crane Services as first choice for many clients seeking lifting solutions in the rail network.

The value of being able to foresee problems and plan tasks effectively allows us to execute jobs in a safe and timely manner even in the most arduous conditions.

There is no challenge too great as we live our motto of **'getting the job done'**

- North Western Program Alliance
- Caulfield to Dandenong LXP
- Southern Program Alliance
- Mernda Rail Extension
- North Eastern Program Alliance
- Greater North Program Alliance
- Ballarat Line Upgrade
- Regional Rail Link
- Burke Rd Grade Sep.
- Blackburn / Heatherdale Grade Sep.

WATER

From tunnelling, to treatment plants to pipelines, the opportunities in water infrastructure are significant at Metcalf Crane Services. Whether it is providing man-box certified cranes to service tunnel access shafts, carting pipe sections on MHH trucks or installing large capacity TBMs, water jobs are a staple for us.

A reliable work force and modern equipment make us an easy choice for the contractors tasked with building and maintaining water resources.

- Epping Main Sewer
- Craigieburn Water Treatment
- Alphington Sewer Upgrade
- Eastern Treatment Plant
- Amaroo Sewer Project
- Carlton Main Sewer Project
- St Albans Pipeline Project
- Western Treatment Plant
- Melbourne Main Sewer Project
- Northern Sewerage Project

WIND

With maintenance contracts current for many of Victoria’s existing wind farms and experience in wind farm construction, our Metcalf Wind Services team are well placed to handle all lift requirements within the wind industry.

Gearbox replacements, main shaft repairs and blade tip repairs are just some of the maintenance tasks completed week by week in this market.

Construction capability is just a phone call away with our 600t Demag ideally suited to wind farm construction.

- **Waubra Wind Farm**
- **Crookwell Wind Farm**
- **Codrington Wind Farm**
- **Maroona Wind Farm**
- **Kiata Wind Farm**
- **Gullen Range Wind Farm**
- **Portland Wind Energy Project**
- **Challicum Hills Wind Farm**
- **Macarthur Wind Farm**
- **Gunning Wind Farm**

BUILDING

Whether it's installing precast panels at a factory in the outer suburbs or roof sheets on a commercial construction site the service remains the same.

Simple tasks are often confounded by the volume of other activities often seen on building sites so being able to forecast what might get in the way of a simple task puts us in a good position to help out where possible.

Helpful and sensible crews along with the correct lifting resources help us get the job done every day.

- Modular Housing Construction
- Royal Victorian Eye & Ear Hospital
- St John of God Hospital
- Monash Hospital Upgrade
- Victoria Harbour WP10
- Post Entry Quarantine Facility
- Ravenhall Prison Project
- 250 Spencer St
- Metropolitan Remand Centre
- Myer Emporium

HEAVY HAULAGE

Still a compliment to Metcalf Crane Services, Metcalf Heavy Haulage operates independently and services the heavy haulage industry Australia wide.

The modern Metcalf Heavy Haulage fleet accommodates all transport requirements with Tilt Tray, Crane Truck, Flat-Top, Drop-Deck, Extendable, Road Train and B Double combinations available. We have 3x8 and 4x8 low loader combinations allowing for up to 75T loads.

Providing the same confidence to our clients that has been benchmarked by the Metcalf Crane Service business, Metcalf Heavy Haulage will provide your transport solutions.

TRUCKS

- Prime Movers rated to 140 tonne
- Tilt Trays
- Crane Trucks
- Tray Trucks
- Gear Trucks

TRAILERS

- Low Loaders up to 75 tonne capacity
- B Double Combination Machinery Trailer
- Road Train Combination
- Step Deck Trailers
- Flat Top Trailers
- Extendable Step-deck
