Version 2.1	Dec 2020	Updating lifting gear register and risk assessment

Compliance Pack

INTRODUCTION

Metcalf Crane Services recognises the importance of ensuring that all the correct information is outlined to you as our clients.

This document provides you with the relevant information to ensure that Metcalf Crane Services have the correct documentation for the crane that you wish to engage to provide you with the equipment and services that to desire.

PURPOSE

The purpose of this Compliance pack is to provide you with the right documentation and or information to assist you with making the right decision that Metcalf Crane Services have the right equipment and documentation required to complete the operation for you.

GENERAL INFORMATION

Make	Link-Belt
Model	RTC-8050 Series II
Serial Number	J6K2-2981
Registration	(unit 86)

OPERATOR'S MANUAL

The Operator's Manual can be found within the cabin of the crane for easy reference when required.

The Metcalf office also has access to an electronic copy of the Operator's Manual. The cover of this manual is seen in Figure 1.

Figure 1

Compliance Pack

PLANT LOGBOOK - DAILY INSPECTION

The Use of the Plant logbook is completed by the crew prior to commencing work each day/shift.

This is the responsibility of the Operator to ensure this is done. See Figures 2 and 3 for a copy of the cover page and example of the Daily inspection logbook form

REGISTRATION OF PLANT

The Occupational Health and Safety Amendment Regulations 2014 came into effect on 1 July 2014. From 1 July you no longer required to register items of plant with the WorkSafe or re-register plant every five years.

With advances in technology, the WorkSafe is able to rely on other sources, including an extensive network of stakeholders and supplier, for information about the location of plant in Victoria, and so the registration of plant isn't as important as it once was.

Some sources that can be used to track plant equipment are VicRoads registration and the CraneSafe program (Section 8).

If Metcalf still have the crane registered with as plant through WorkSafe a copy will be here. (Figure 4)

Figure 4 NA

Compliance Pack

MAINTENANCE INSPECTIONS AND GREEN STICKER PROGRAM

These inspections are carried out by our qualified Mechanic at approximately every 250hrs; these records are stored at the office and are available on request

The mobile crane industry initiated a voluntary crane assessment program throughout Australia. Developed in consultation with the mobile crane industry as a whole, the program aims to augment existing safety standards with annual assessments of mobile cranes now being made by CraneSafe (a division of The Crane Industry Council of Australia).

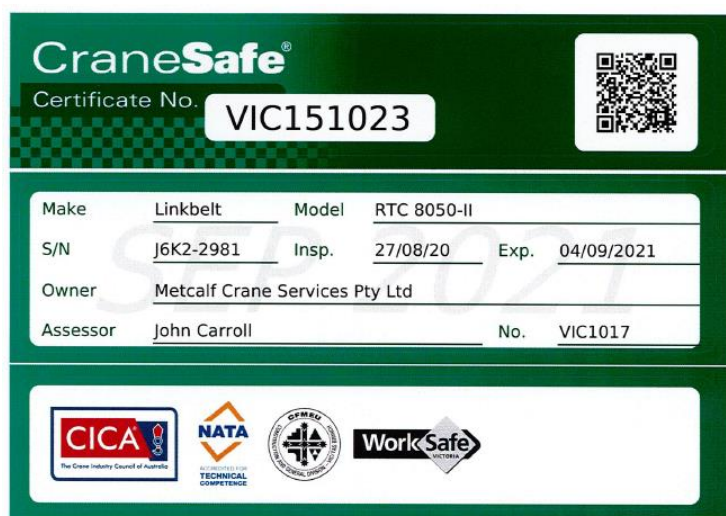

The program will provide crane owners, suppliers and users in Australia with a common industry wide system for third party assessment of the safety aspects of their cranes. The CraneSafe assessment program is voluntary and while it does not form part of any legislation or regulatory scheme, it will assist crane owners and users in Australia to meet their obligation under the OH&S (plant) regulations to ensure that their cranes are in a safe condition. The program provides crane owners and operators with a process for third party assessment of the safety aspects of their cranes that complies with the regulations of Parts 1, 3, 4, 5, 11, 19 and 20 of AS2550 for annual inspection.

All Metcalf Cranes are involved in this program and a copy of the Green sticker is provided as evidence of this. (Figure 5)

Major inspections should generally be undertaken when the crane, hoist or winch has reached the end of its design life. If the design life is unknown, in most cases, the major inspection of mechanical components should be undertaken after a maximum of 10 years of service.

This report will be attached in figure 6; NA will be added here if the Crane is less than 10 years old.

Figure 5

Compliance Pack

Figure 6 NA

PLANT RISK ASSESSMENT

The review of the manufactures Risk assessment takes place when the plant is been purchased by the company, if the manufacture has not supplied one, Metcalf will provide one.

The RA will be reviewed periodically and in the event of a serious incident.

This RA can be found in the crane cabin. (Figure 7)

Figure 7

RISK ASSESSMENT					
ISSUE DATE: 01 January 2021			DATE OF REASSESSMENT: 31 December 2021		
CRANE SAFE SERIAL NUMBER: RTC A 133933-6			CRANE SERIAL NUMBER: J6K2-2981		
CONDUCTED BY: B. Schiopu					
Item#	Hazard	Is there a risk? (Y/N)	Control Measures	Are the control measures practicable? (Y/N)	Date of Implementation
Generic Hazards					
1.	<i>Operator Aids:</i> Slips, trips, and/or falls	Y	High elevation, slippery surface, or non-weight supporting surfaces (such as the engine hood and some sheet metal areas) can cause slips, trips, and/or falls leading to serious personal injury during access and egress during operation and maintenance of the crane. The crane is equipped with steps, ladders, platforms, non-skid walking surfaces, etc. to help prevent slips, trips, and/or falls. Use the aids to access and egress the crane. Always stay in three points contact (two hands and one foot or two feet and one hand) with the crane during access and egress. The Crane is equipped with steps, ladders, platforms, non-skid walking surfaces, etc. to help prevent slips, trips, and/or falls during crane access and egress. Ensure all these surfaces are kept clean and free of oil, grease, fluids, snow, ice, etc. that would make the surfaces slick and unsafe to walk on. Also ensure all these aids are kept maintained to the original design.	Y	Prior to use by the hirer. Prior to supply.
2.	<i>Operator Aids:</i> Fire	Y	Crane operations requires working around several highly flammable products such as diesel fuel, oils, greases, cleaning solutions, etc. A fire extinguisher is mounted in the operator's cab. The operator should be trained in its use. It should be checked daily for proper charge.	Y	Prior to use by the hirer. Prior to supply.
3.	<i>Operator Aids:</i> Tipping/overturning the crane	Y	All "On Outrigger" capacities require that the crane be levelled on the outriggers with the tires clear of the ground. All "On Outrigger" capacities are invalid if the crane is not	Y	Prior to use by the hirer. Prior to supply.

Compliance Pack

LIFTING GEAR REGISTER

The Lifting Register is maintained by Metcalf for all their lifting equipment which is a live document that can and will change on a regular basis. All lifting equipment which includes but not limited to Slings, chains and shackles will be tested to Australian Standards. This crane's lifting register is below (Figure 8)

Compliance Pack

ENTERPRISE BARGAINING AGREEMENT

Modern awards cover a whole industry or occupation and provide a safety net of minimum pay rates and employment conditions.

Enterprise agreements can be tailored to meet the needs of particular enterprises. An agreement must leave an employee better off overall when compared to the relevant award or awards.

Enterprise agreements are collective agreements made at an enterprise level between employers and employees about terms and conditions of employment. Metcalf's EBA shows below: (Figure 12 and 13)

SOMERTON VICTORIA 3062

DETERMINATION OF COMPLIANCE WITH SECTION 11
ABCC EA ID: EA5746
FWC Matter Number: AG2016/5531
FWC Variation Number: AG2017/5754

Dear Mr Finnerty,

On 4 April 2018 you requested advice from the Australian Building and Construction Commission (ABCC) on whether the registered enterprise agreement listed in your request meets the requirements of the *Code for the Tendering and Performance of Building Work 2016* (the Building Code 2016).

This Determination of Compliance is issued for the following registered enterprise agreement because it meets the requirements of section 11 of the Building Code 2016:

**METCALF CRANE SERVICES PTY LTD AND THE CFMEU MOBILE CRANE HIRING
INDUSTRY ENTERPRISE AGREEMENT 2016 - 2019**

Accordingly, by virtue of section 22(3) of the Building Code, this determination is taken to be conclusive of the fact that this registered enterprise agreement meets the requirements of section 11 of the Building Code 2016.

Note: This Determination of Compliance is based on the enterprise agreement registered with the Fair Work Commission at the date of this determination. If the registered enterprise agreement is varied after this date, the Determination of Compliance ceases to be effective. In these circumstances, you will need to consider submitting the varied agreement for further advice.

Parties must also comply with all relevant provisions of the Building Code 2016 in relation to their practical on-site application. The ABCC monitors behaviour on sites to which the Building Code applies and investigates any alleged breaches. The ABCC can be contacted through its hotline on 1800 003 338 or at www.abcc.gov.au.

The Building Code 2016 is available at <https://www.legislation.gov.au/Details/F2016L01859>.

Yours sincerely

Tom Cagorski
